WOTORI

Decentralised Animation Studio

Creator

Wotori Movako

15 years in the industry of computer animation, game design and software development. Master of Design. Master of Engineering in Computer Science.

Problems

Artist sells rights on his work to studio receiveing one-time payment.
Studio endlessly monetizes artist’s art.

Artists are mostly on their own, no mechanics to interact with artist from another medium.

Many people want to get involved but don't know how to draw or work in 3D.

Sophisticated copyright system.

WOTORI

worlds + stories

A decentralised animation studio where people can collaborate on content creation, share stories, build games, create animated movies and worlds, and earn profits when their content is used in games, animations, and more by users and developers.

Core concept

github like platform for artists

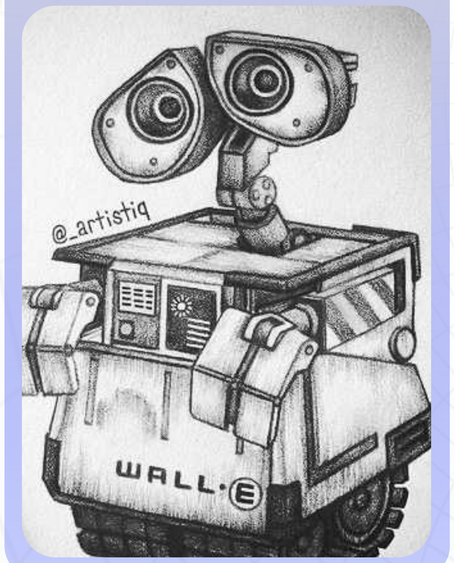
USER 1

WALL-E TEXT

WALL-E, a compactor robot who has achieved sentience, he is the only one still functioning on Earth.

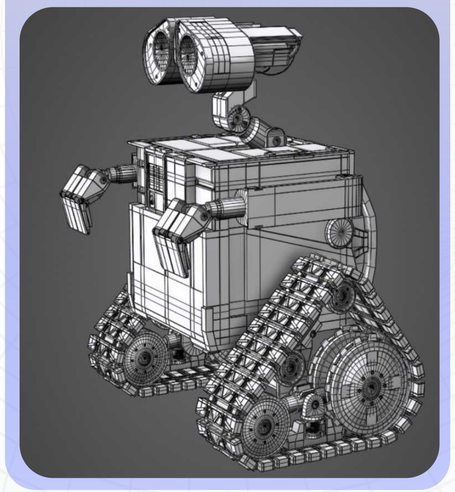
USER 2

WALL-E IMG



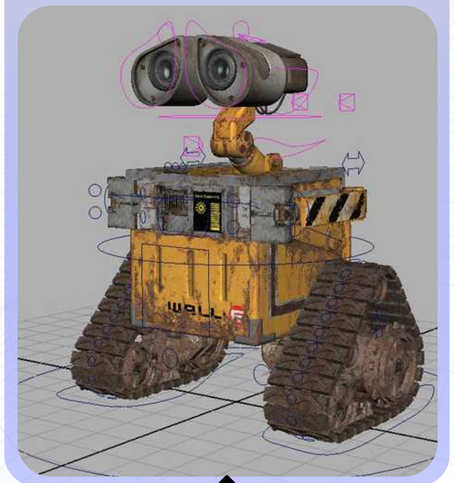
USER 3

WALL-E 3D model



USER 4

WALL-E rig



USER 5

WALL-E animations

Solutions

The artist owns their art for life and receives royalties when the work is used.

Simplified mechanics of cooperation, interaction and joint earnings.

Such a mechanics that allow anyone can contribute simply by writing a text.

Smart contract setup system for managing commissions between participants.
